

HIGH EFFICIENT

# Electromagnetic Clutches and Brakes

## Boeli Easy 01 and 02 line

Electromagnetic single disc clutches and brakes are used in machines with central drive for starting, stopping and holding in position. Boeli products are well-known by compact design, short engagement times and are maintenance free.

### Features:

- Clutch and braking torques from 1.8 - 1.500 Nm
- 12 designs
- 9 sizes
- DC voltage: 24 V
- Insulation class: B (130°C)
- Compact design
- Low-noise operation
- Low magnetic leakage flux
- No backlash in torque transmission
- High operation frequency
- Maintenance free: no re-adjustment, no sliprings

### Application areas:

Mail processing, winding equipment, packaging machines, roller conveyors, gate systems, strapping machines, agricultural machinery, textile and laundry machines, folding and printing machines

Unique designs are possible.
